¹The Bachelor of Arts degree requires fourth-semester proficiency in a second language. Science: 2 Tier One and 1 Tier Two NATS (Natural Science) courses fulfill the science requirement. Upper division (300-400 level) units: 42 required. See Advisement Report (ADVIP) for details.

²These courses are recommended for most math majors. Other courses that can be used are: CSC 227, ECE 175, MIS 301, MSE 350, and PHYS 305. These latter courses may have additional eligibility criteria. ³MATH 313 replaced MATH 215 as of fall semester 2015. Students who completed MATH 215 prior to fall 2015 or who have transfer credit equivalent to MATH 215 will still fulfill this requirement, though they will not earn upper-division credit for the course. ⁴All emphases except Education require a minor; the General/Applied, Comprehensive, and Probability & Statistics emphases allow a minor in any subject. The minor should be selected in consultation with faculty advisor. Double-dipping between the math major and a minor is NOT permitted, with the one exception of the introductory programming course, which may also be used in a minor. Double majors are not required to have a minor. If pursuing a double degree, consult with your major advisor regarding UA requirements. ⁵The Computer Science emphasis requires a Computer Science minor. ⁶The Economics/Business emphasis requires an Economics, Finance, or Business Administration minor, or a Thematic minor with an Econ, Finance, or Business Admin emphasis (approved by your advisor). ⁷The Life Sciences emphasis requires a minor in a Life Sciences area; the sixth course will be upper-division MATH (or cross-listed) and approved by your math faculty advisor. ⁸This 400-level course is to be selected with approval from your math faculty advisor. At least 15 units of 400-level MATH course work are required for the major. ⁹The pedagogy courses within the Mathematics Education emphasis replace the minor requirement. No additional minor is required.
